Czech health insurance coverage

IVF is covered by health insurance companies no more than three times in a lifetime, or four times if no more than 1 human embryo resulting from in vitro fertilisation was transferred to the woman's womb. It is covered until the age of forty.

Public health insurance COVERS THE FOLLOWING in an IVF

cycle: IVF cycle = consultation, development of a stimulation protocol, hormonal stimulation, ultrasounds, sperm processing, anaesthesia, IVF fertilisation, embryo transfer, STD testing, partial payment for medications.

Public health insurance DOES NOT COVER the following in

an IVF cycle: all laboratory methods, drug copays, cryo-embryo transfer, sperm and oocyte cryopreservation.

Additional information

Additional methods and services are paid on the day of the egg puncture. The discounted method package is paid on the day of the puncture after egg retrieval. The price of the basic program does not allow for an additional discount. Please contact us to request a brochure which contains further details of all the treatment programmes we provide at our clinic.

THANK YOU programme

We know that the financial aspect is often one of the most important considerations in fertility treatment. Our clinic will always give you all the information you need to make a qualified decision. In addition to an individualised approach and support to help you overcome your fears and increase your chances of a successful pregnancy, Europe IVF offers cost-effective treatment programme packages.

We have also created the THANK YOU programme, with which we would like to thank our clients for choosing our clinic by providing benefits adapted to their needs. If you have any questions about our targeted treatment programmes or the Thank You programme, you can call us right away.

You dream. We care.
