Deposit for Cycle DO 2 embryos Guarantee+3rd cycle for free

2 500

The deposit is deducted from the total amount of the treatment

*** Terms of package:**

- Unused methods from this package are non-refundable.
- Guaranteed blastocyst stage embryo (5th day of development during cultivation) provided that the sperm quality is not classified as OAT or worse and no MESA/TESE procedure has been performed. If a fresh cycle with donated eggs does not result in embryos suitable for freezing, we guarantee the preparation of a new embryo with the eggs of a new suitable donor and the partner's frozen sperm for a cryo-embryo transfer. In order to ensure the treatment's maximum success, a doctor or embryologist must approve entry into the guarantee programme / treatment cycle.
- Guarantee of 3rd free cycle. Clients who do not conceive with us (confirmed heartbeat) after two cycles with donated eggs (after the transfer of all embryos created in each cycle) will receive a 3rd cycle free of charge (valid for 12 months after the last embryo transfer).

Thank you programme

To thank our patients for the trust they place in us, we have created the THANK YOU Programme. Its purpose is to offer meaningful benefits as a gesture of appreciation for choosing our clinic.

If a full IVF cycle does not result in pregnancy, patients are eligible for a 10% discount on a subsequent full IVF cycle. This discount also applies if the patient chooses to proceed with IVF using donated eggs following an unsuccessful IVF cycle.

Payment and cancellation conditions

- Payments can be made in cash (in CZK/EUR), by credit card (Mastercard and Visa), or by bank transfer to the Europe IVF account in CZK: 8490972 / 0800 or in EUR: IBAN: CZ34 0800 0000 0000 0841 4072, BIC (SWIFT): GIBACZPXXXX.
- We recommend making the bank transfer at least 3 working days in advance. Payment cards usually have a set daily limit on the amount of the payment, please check that the set limit is sufficient.
- Additional laboratory methods or additional services are due no later than the date of the embryo transfer. Embryo transfer is only performed after payment of the total cost of treatment.
- For treatment with donated eggs, Europe IVF reserves the right to discontinue treatment due to complications on the part of the donor and for health reasons. In this case, the clinic will always offer a new donor (genetics - biometrics - phenotype compatibility).
- Each interruption of treatment by the patient is always assessed individually at the same time Europe IVF claims reimbursement of all costs related to the services already provided or laboratory tests and administrative tasks demonstrably performed, which are charged to our clinic by external suppliers.
- Advanced payments are non-refundable.
- Advances are in the form of a confirmed booking for scheduled treatment valid for 7 months from the date of the advance invoice.
